15th International Power Electronics and Motion
Control Conference
Novi Sad, Republic of Serbia**

**INVITED SPECIAL SESSION:
“Non-contact power supply technology”**

organised by

1. Hitoshi Hasegawa, Railway Technical Research Institute in Japan,
hasegawa@rtri.or.jp

Call for Papers

Recently, many electronic devices have become wireless, and the demand has increased for non-contact power supply systems (NCP) for supplying electricity and for charging/recharging. Moreover, many applications of NCP are studied in transportation systems, such as electric vehicles and trains.

In this session, we would like to hold discussions varying from fundamental characteristics of systems to applications, regardless of NCP capacity (in the range of several milliwatts to several kilowatts).

The scope of this session is as follows:

New ideas for NCP
Application to electric equipment
High-efficiency and low-cost technology
Safety and reliability technology
Any other topics related to NCP

However, the discussion should be limited to topics that involve electric fields, magnetic fields, and interactions between electric and magnetic fields.

We look forward to receiving many submissions of papers on NCP.

Submission procedure: The same as for regular papers.

Submission deadline: 19th December 2011

All the instructions for paper submission are included on the conference website:
<http://epe-pemc2012.com/>
